

Course in Creative Painting and Experimental Dance

BODY, MIND AND SPIRIT TOGETHER

Developing creativity and spontaneity in painting and dance. We will learn techniques of painting and dance; recapture our ancestral roots.

The dance improves social relations, movement, rhythm, space, observation and relaxation.

The painting is a journey not a destination, it is an energy that teaches you to go deeper into your soul.

The teacher and the students will create the class together.

Like Goethe said "*don't waste your time be what you want to be*"

Don't miss it.
